OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

Oscar looks on with concern at the city shrouded in a smoggy haze, troubled by the oppressive disorder of garbage and cigarette butts.

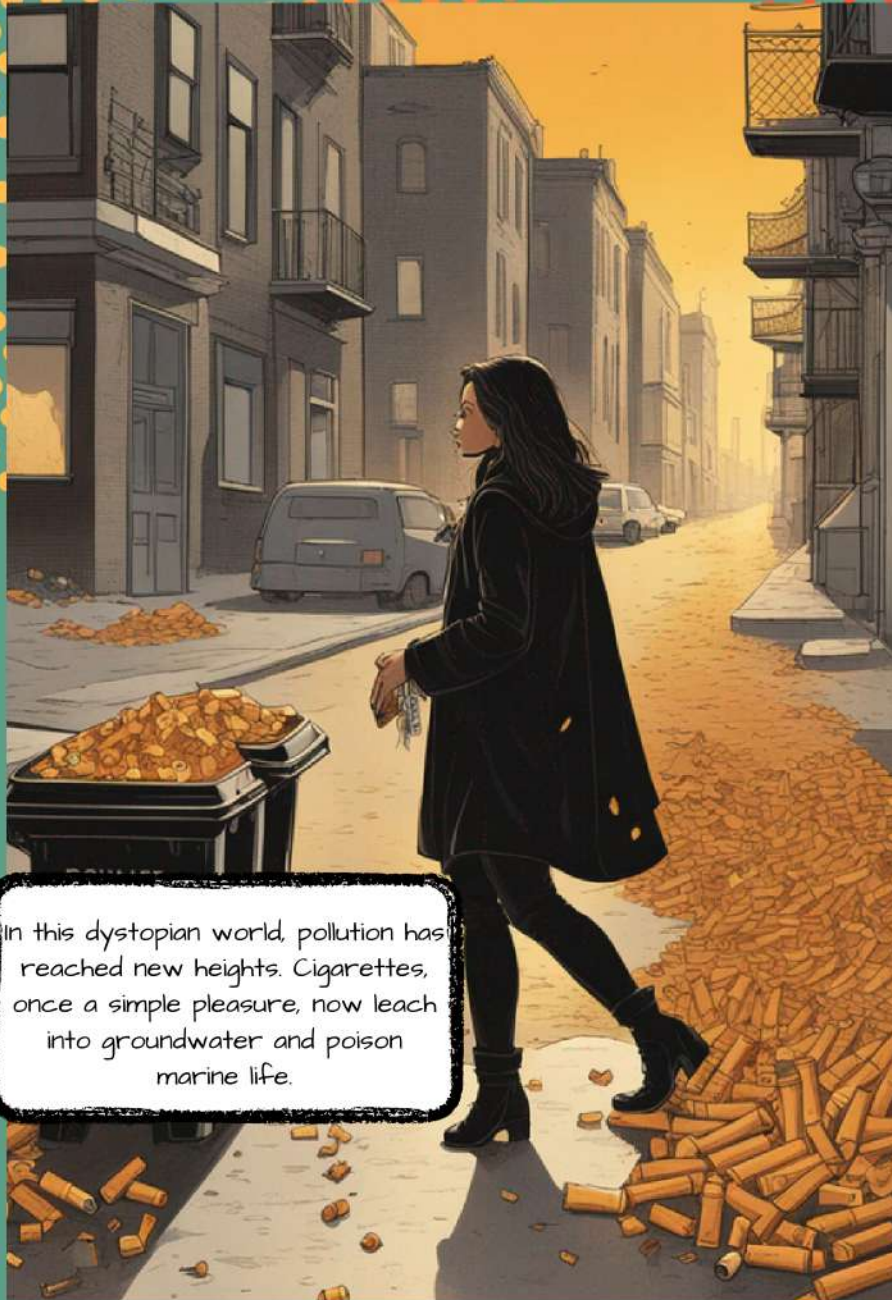

Captain Ecology, we have a huge problem!

We must act immediately, Oscar. A silent danger threatens our environment!

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

In this dystopian world, pollution has reached new heights. Cigarettes, once a simple pleasure, now leach into groundwater and poison marine life.

But for some, the fight against pollution is a full-time job. These heroes toil tirelessly to stem the tide of waste and mitigate the damage already done.

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

We need to find a way to reduce this type of waste...

Captain Ecology, the situation is unsustainable!

You're right, Miss Recycle. We need to turn this situation around.

Are you ready to spring into action? Oscar is waiting for us at the headquarters.

OSCAR AND THE RECYCLING TEAM

SMOKING GLASSES

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

I know, Miss Recycle. That's why we need our team of experts.

Follow me, there's someone who can help us...

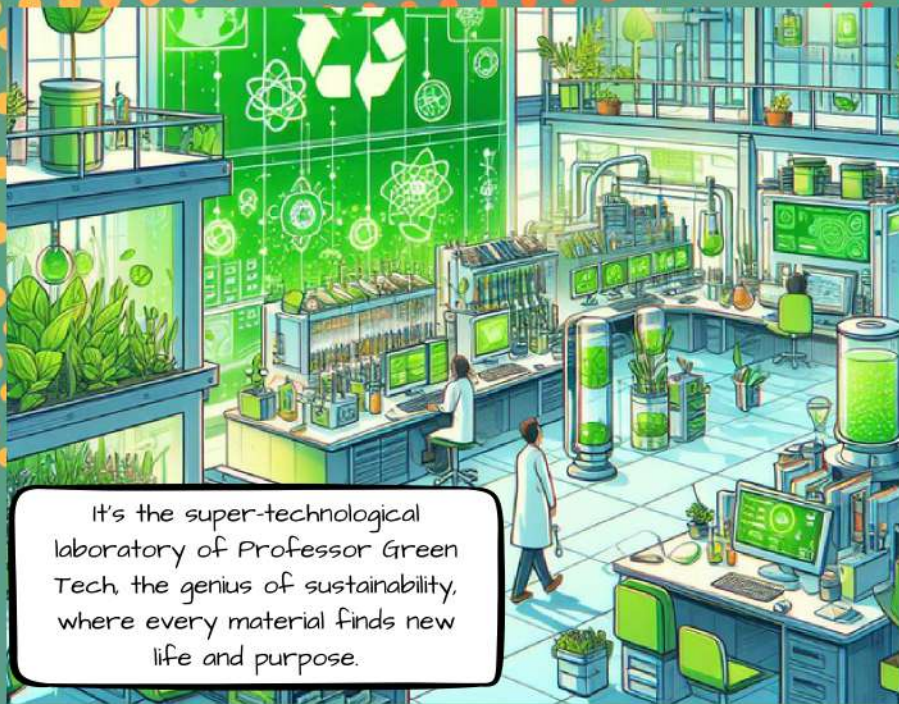

Who is hiding behind the mysterious door?

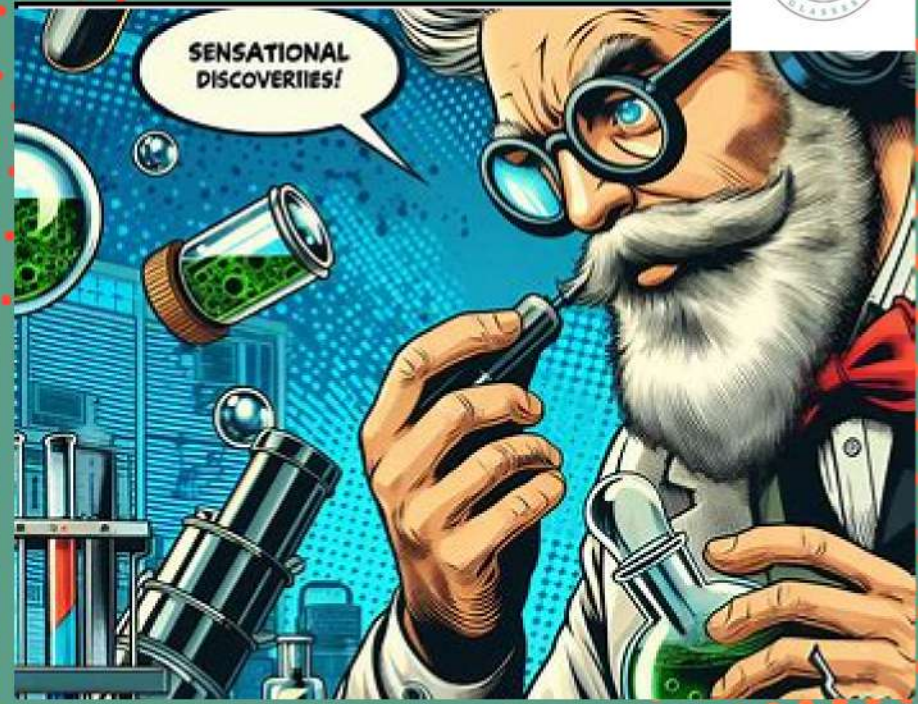

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

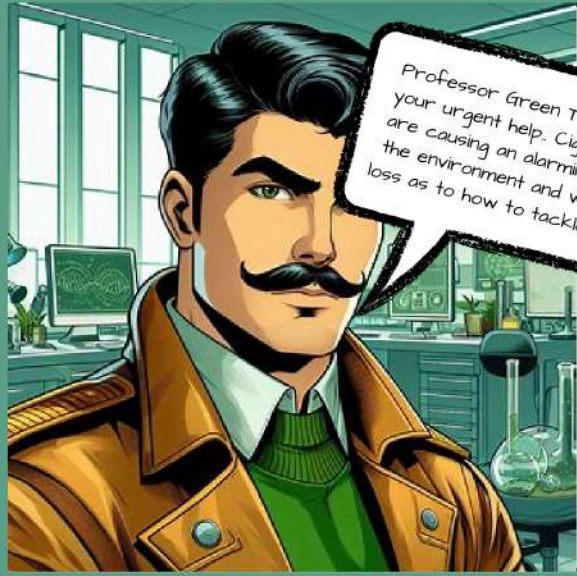

It's the super-technological laboratory of Professor Green Tech, the genius of sustainability, where every material finds new life and purpose.

SENSATIONAL
DISCOVERIES!

Welcome, my friends! What a pleasure to see you here in my humble laboratory. To what do I owe the pleasure of your visit?

Professor Green Tech, we need your urgent help. Cigarette butts are causing an alarming threat to the environment and we are at a loss as to how to tackle this issue.

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

Yes, we are desperate to find a solution to this problem."

Professor, we know you're the genius of sustainability. If there's anyone who can help us solve this dilemma, it's you.

Professor Green Tech, we need your brilliance to turn this threat into an opportunity for the planet.

OSCAR AND THE RECYCLING TEAM

SMOKING GLASSES

Fear not, my friends. I'm here to help you. We will find a solution together. Thanks also to the help of Agent Green Fashion.

Agent Green Fashion also joins the team, with their unmistakable fashionable look, but ready for action.

Our heroes immediately get to work, discussing and brainstorming ideas to find a solution, to the cigarette butt problem.

We need fresh and innovative ideas to tackle this cigarette butt problem.

Yes, we need to think of something creative to turn this threat into an opportunity.

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

I also want to contribute to finding a solution. We need an approach that combines sustainability and style.

Well said, Agent Green Fashion. Innovation and fashion can be powerful allies in the fight against pollution.

The team gathers around a table, with Professor Green Tech pointing to a diagram on a whiteboard. Everyone engages in lively discussion as they try to find a solution.

OSCAR AND THE RECYCLING TEAM

SMOKING GLASSES

What if we used technology to monitor and recycle cigarette butts more efficiently?

We might be able to use an advanced recycling process to turn cigarette butts into a useful and sustainable material.

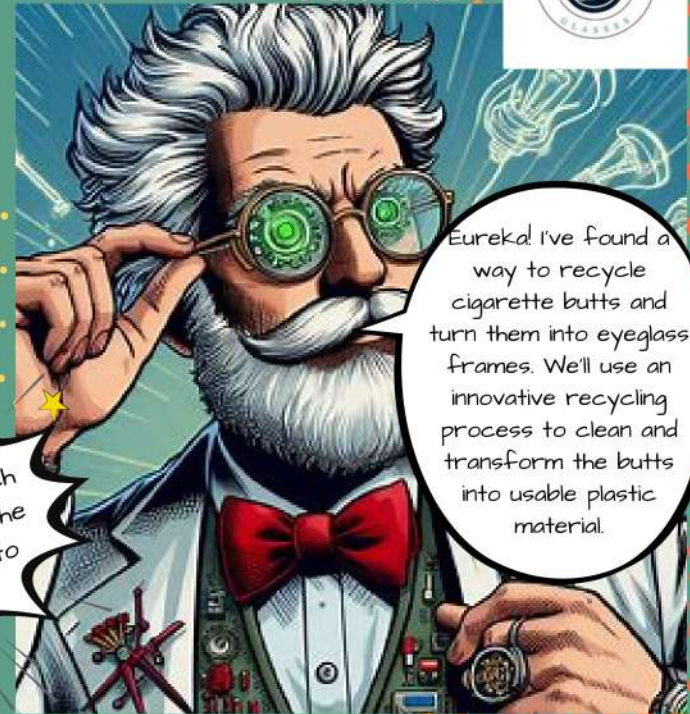

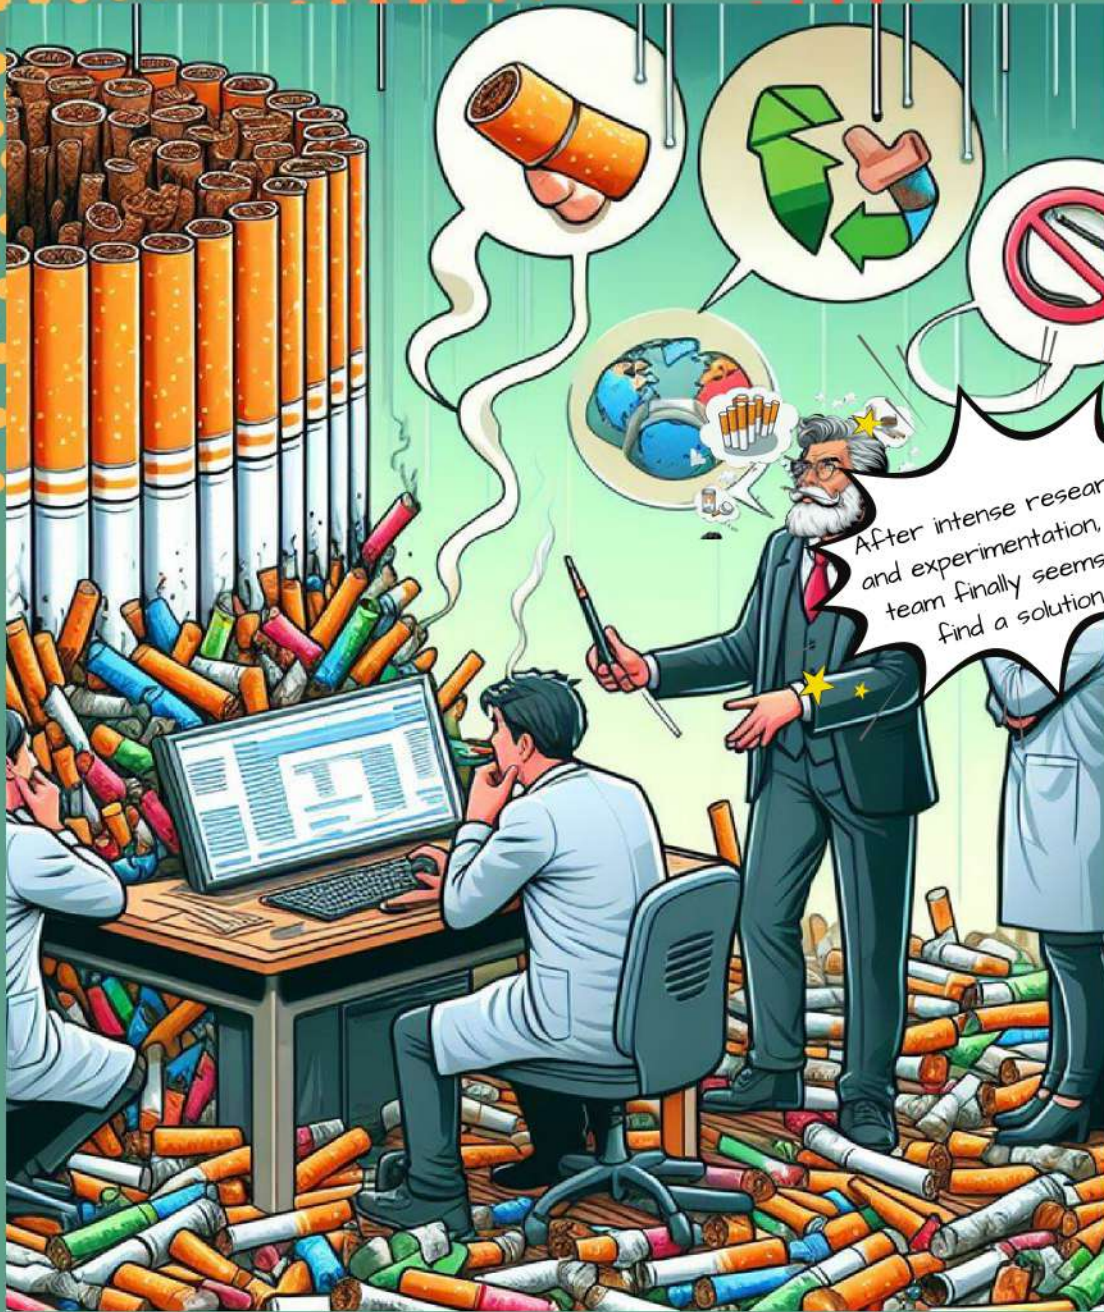

Indeed, we need to think of something innovative, something that can capture the world's attention and inspire ecological actions!

What if we turned this waste into something beautiful, useful, and sustainable?

OSCAR AND THE RECYCLING TEAM

SMOKING GLASSES

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

It sounds like a brilliant idea... And I already know who we can turn to....

Fantastic! It seems perfect to address the cigarette butt problem and promote sustainability.

I have an idea! We could ask for help from Essequadro Eyewear, from the Scauzillo family in Ariano Irpino, and from Cerict. Their Made in Italy eyewear company is always attentive to sustainability and could support the cause.

The recycling team enters Stefano Scauzillo's office...

Welcome! What can I do for you?

We have an ambitious project for Essequadro. We want to turn cigarette butts into eyeglass frames!

But we need your help to get it off the ground.

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

Interesting.. At Essequadro, I have an amazing team who will be happy to lend a hand, and we can also count on CeRICT.. But how can we convince people to recycle cigarette butts?

With an awareness campaign! We need to make them understand the importance of recycling and reducing waste.

YES!

And with your skills in design and production, you can turn cigarette butts into high-quality frames!

Together we can make a difference, Stefano. Help us save the planet, one pair of glasses at a time!

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

I am happy to introduce you to my super team: Simone Sorrentino, Antonio Biele, and Michele Cristino. Like me, they are fully in favor of environmental sustainability.

I'm Antonio Biele, Export Manager of the Essequadro Group, and we already have some ideas on how to engage the local community and beyond...

I am Michele Cristino, production manager, and I believe that the students of 2b and 3b at Ipseo De Gruttola could help us with the awareness campaign and the collection of cigarette butts.

I'm Simone Sorrentino, manager of Essequadro, and I assure you that we are ready to get to work!

LET'S GO!

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

Now all we have to do is go to 'De Gruttola' to ask the students of 2^B and 3^B of the IPSEOA to lend us a hand and join us in this exceptional mission.

Guys, we need your help to spread the message and collect the cigarette butts. Only with your creativity and commitment, can we truly make a difference!

GO!!

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

Guys, we need you!
We're asking for
your help to spread
the message and
collect cigarette
butts. Every little
gesture counts!

The students are
engaging in the
collection campaign
and...

It's a fantastic project
We're ready to help
you.

WOW!

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

...in the awareness and collection campaign of cigarette butts, actively involving the local community.

I'm so proud to see how much effort the students are putting into this cause.

Yes, they are the future of our planet and they are showing they are ready to make a difference.

OSCAR AND THE RECYCLING TEAM

SMOKING
GLASSES

Thanks to you and with the help of the students from De Gruttola, we managed to transform cigarette butts into eyeglass frames, reducing pollution and promoting sustainability.

It's incredible to see how we've turned something harmful into something useful! You've been phenomenal, guys! And so, the students of a small school and a company in a small town have shown that together, we can change the world!

Thanks to you, Ariano Irpino will be an example of how small actions can make a big difference for our planet!

Remember to keep recycling for a more sustainable future. One cigarette butt at a time, we will make the world a better place!
