

<p>We decided to choose the project on the metro line 1 of Naples. We want to improve the SUSTAINABILITY of the metro chosen by us, in particular from Piazza Garibaldi to Capodichino station. Check whether the implementation of the INVESTMENT with the related expenses is still feasible. In the determined plan we will appraise various SOLUTIONS, choosing then the most opportune one based on the criteria and the ECONOMIC AVAILABILITIES to we conferred.</p>	<p>Data of context:</p> <p>Investment fund</p> <p>Energy consumption used by the meter</p>	<p>Project and theme chosen on OpenCoesione</p> <p>The Earth returns to the light</p> <p>Completion Metro of Naples - Line 1</p> <p>In the following project we'll talk about Line 1, which connects the terminus Garibaldi/ Capodichino</p>	<p>Experts on the subject to be involved in the territory</p> <p>P.A., experts, friends of ASOC, journalists, environmental and third sector associations.</p>	<p>Communication format and engagement strategy</p> <p>The involvement of the local community will be realized with interviews, questionnaires, mass media and social</p> <p>The communication strategy will be realized with the use of images with captions and we have already written a text to introduce the chosen project outlining a short elaboration. Finally, web pages have already been created in Instagram, Facebook and Twitter so that our sustainability project can be effective and innovative, that can involve not only people in our city, but also tourists. Our goal is to entice outsiders to our team for an exchange of ideas and opinions that will be appreciated to improve our sustainability activity.</p>
