

<p><b>We decided to choose the great project of completion of line 1 of the Naples metro. The research we have chosen to work on is that on the works of the station under construction called Capodichino, which aims to connect the entire city with the Airport International of Capodichino, and allow users to get there by train easily. We want to supervise the CONSTRUCTION of the metro chosen by us. Check whether the implementation of the INVESTMENT with the related expenses is still feasible and promoting</b></p>	<p><b>Data of context:</b></p> <p>Investment fund</p> <p>The monitored payments</p>	<p><b>Project and theme chosen on OpenCoesione:</b></p> <p><i>The Metro's Construction</i></p> <p>Completion Metro of Naples - Line 1</p> <p>In the following project we'll talk about Line 1, which connects the terminus Garibaldi/ Capodichino</p>	<p><b>Experts on the subject to be involved in the territory:</b></p> <p>P.A., experts, friends of ASOC, journalists, environmental and third sector associations.</p>	<p><b>Communication format and engagement strategy</b></p> <p>The involvement of the local community will be realized with interviews, questionnaires, mass media and social.</p> <p>The communication strategy will be realized with the use of images with captions and we have already written a text to introduce the chosen project outlining a short elaboration. Finally, web pages have already been created in Instagram, Facebook, Youtube and Twitter so that project can be effective and innovative, that can involve not only people in our city, but also tourists. Our goal is to entice outsiders to our team for an exchange of ideas and opinions that will be appreciated to improve our activity of constant observation of this metro.</p>

**sustainable urban mobility and urban logistics.**

**Additional searches:**

Web pages, distributed questionnaires and interviews, official and unofficial documents.

**Value for the community:**

Our research will have the task of bringing about great changes in infrastructure and especially in improving travel from one place to another. In fact with this metro, our city will be among the first to have a connection between the most important points: Port, Railway Station and Airport. It could be interesting to the community and any possible tourist.
