Communication format and involvement strategy

Instagram, Facebook (to communicate by our action by photos and texts) , Photo exhibition, Talk in the City Council ,Video.

Value for the community

Our research could make citizens be aware about public and European funds, useful for our community. People could raise their awareness about the preciousness of water in people's lives. they could be encouraged not to waste it, to find ways to recycle it. Moreover, it could also encourage the administration to improve the water mains.
