

Hi everyone!

We are New Horizons, a group of students from Liceo Ettore Palumbo in Brindisi and this is the presentation of our project.

We chose this project because we think it would make a difference in our territory and increase the popularity of the history digital library of our city.

We were chosen as a team among many others to take part in this project and we are honoured to be able to express our ideas and hopes for the future of Brindisi, and that's why we chose this name for our team.

This Library offers many activities and initiatives belonging to different fields of culture in order to invite young people to approach new interests.

We therefore invite you to join us in this experience through our blog and to get to know our project!

Here some data to get to know our project better.

a little bit about it

With a cohesion fund of € 319,263.02, the project was expected to start in 2018 and to end in 2021, but the operations actually took place from 2019 to 2020. All the funds that had been given to this project were used.

Here are some more informations about our choices:

why did we choose this project?

We chose this project because it focuses on the development of our local territory. As students from a linguistic high school, we are particularly interested in promoting quality and cultural tourism. Investigating how these funds have been allocated allows us to explore whether they have genuinely enhanced the area's potential for sustainable tourism. We are also curious to understand what the site looked like before the interventions and how this space has been transformed. By exploring these aspects, we hope to assess the effectiveness of these investments and their long-term impact.

4Clas. 2024/2025
